PROJECTS

EtsAClone - JavaScript, React, Redux, Rails, PostgreSQL, HTML5, CSS3
[Link](#) | [GitHub](#) | Full-stack, single-page e-commerce app inspired by Etsy

- Designed a custom shopping cart mechanism using modular React components to keep code DRY and Redux architecture to maintain continuity of cart items and total price between purchases
- Implemented secure user account creation and login with password hashing through BCrypt and unique session tokens
- Developed site-wide search feature with PostgreSQL's PgSearch that queries the database and retrieves data by the order of relevance
- Enhanced scalability and performance by leveraging Paperclip and AWS S3 to remotely store images

!1010! - JavaScript, HTML5 Canvas

[Link](#) | [GitHub](#) | Highly addictive, Tetris-like puzzle game inspired by 1010!

- Implemented game logic by leveraging prototypical inheritance and object-oriented programming design principles, and separated game-state and visual rendering, ensuring predictable behavior
- Created drag and drop functionality using HTML5 Canvas and JavaScript event listeners to detect mouse movements

DOMiNodes - JavaScript

[GitHub](#) | JavaScript library for DOM manipulation inspired by jQuery

- Designed a lightweight library that manages DOM traversal, event handling, and AJAX requests using native DOM API
